Professional Summary

Seasoned Product Manager with 12+ years of experience defining and scaling **enterprise digital and data products with proficiency in delivering GenAI, agentic AI, and data platforms** in complex, regulated environments (**financial services, healthcare, and research**). Proven track record of owning **end-to-end AI product vision, strategy, and execution**, translating business objectives into scalable architecture, operating models, and measurable outcomes. Deep experience with **LLMs, RAG, semantic layers, APIs, and cloud platforms (AWS Certified Solution Architect & Databricks Certified GenAI Engineer)**, combined with strong product, engineering, and governance leadership. Recognized for driving **risk-based decision making, technical trade-offs, modular design, and responsible AI practices**, while leading global, cross-functional teams to deliver high-impact products on time and within budget. improving retention by 12% and penetration by 13%. Served as India Community Co-Lead for IPA at Gartner (~400 associates), Developed 50+ product professionals, demonstrating commitment to long-term organizational capability.

Key Impact

\$138M+ Total revenue generated from products owned end-to-end in last 9 years	90% Reduction in manual data discovery effort via RAG based platform (Research Data Finder)	95% User adoption post-platform migration across 10+ data sources	80% Research artifacts captured within 9 months inside Research Desk	3,000+ MAUs served on Research Desk (Multi Agent Research Platform)	100+ Fragmented tools consolidated into 6 global standard platforms
--	---	---	--	---	---

Core Capabilities

Machine Learning, GenAI & Agentic AI Leadership

- GenAI & Agentic AI Vision, Strategy, and Roadmapping
- Multi-agent system design, orchestration, and Evaluation
- NLP based sentiment analysis, Recommendation systems, RAG & Retrieval optimization
- Guardrails, reliability, hallucination mitigation, and risk-based decision making
- Modular architecture and reusable AI components/frameworks

Product Development & Delivery Excellence

- End-to-end product lifecycle (ideation → PoC → pilot → scale → continuous improvement), market & user research, competitor analysis, product discovery
- Agile (Scrum, Kanban, SAFe), dual-track discovery & delivery, system design, SDLC
- Backlog management, feature prioritization, resource planning, and release governance
- KPI definition (adoption, retention, engagement, ROI), outcome tracking, and executive reporting
- Vendor management, partnerships, and budget oversight

Technology & Architecture

- Semantic layer design, data modeling for AI, data lineage, data engineering
- Data Management, Data Governance, Data products & platforms, Data lakes, warehouse & lakehouse
- APIs, microservices, containerized services, deployment pipelines, CI/CD, cloud platform (AWS/Azure)
- Vector databases, embeddings, and model lifecycle management

Stakeholder Management & Governance

- Cross-functional leadership (Engineering, Data Science, Design, Sales & Service, Compliance, Business)
- Executive communication, change Management, dependency management & global stakeholder alignment
- Responsible AI, data protection, model governance, and QA standards
- Technical trade-offs and architecture decision-making

Professional Experience

EXL | Principal Consultant (AI & Agentic Products) | Nov 2025 – Present

- **Owned product roadmap and delivery plan** for agentic data management platform (EXLData.ai) targeting data quality, data lineage, and governance for regulated industries(BFSI & healthcare).

- Conducted client **workshops** and built **PoVs** on **agentic data governance** and **context engineering**
- Responsible for [EXLData.ai](#) sales enablement and **GTM initiatives**.

Gartner | Sr. Manager – Product & Data Management | Apr 2024 – Nov 2025

- Owned **end-to-end GenAI product vision, strategy, and roadmap** for an enterprise AI platform serving **3,000+ MAUs** - secured senior executive prioritization through structured business cases, ROI modeling, and quarterly roadmap reviews.
- Led **Finder (RAG-based) and Lit Review (multi-agent AI system)** from concept to production, accelerating research ideation cycles by **95%** — orchestrated 25+ member cross-functional teams across Engineering, Data Science, UX, and Operations.
- Designed **agentic AI workflows** including agent orchestration, tool selection logic, and evaluation frameworks covering accuracy, latency, and reliability — applied responsible AI guardrails to mitigate hallucination risk.
- Drove **semantic modeling and data lineage initiatives** to improve AI readiness, data governance, and regulatory compliance of enterprise data assets.
- Collaborated with architects on **cost vs. performance, latency vs. accuracy, and security vs. usability trade-offs** — applied risk-based decision-making frameworks.

Manager – Product Management | Jan 2022 – Mar 2024

- Managed **end-to-end product lifecycle for diagnostic & assessment tools** used by **20K+ assessments across 10K+ enterprise organizations** — improved client retention by 22% through targeted product improvements informed by customer journey analysis.
- Built self-service analytics and insight platforms (12+ dashboards) increasing engagement by 40% and reducing operational dependencies.
- Produced **executive communications and roadmap narratives** to drive strategic decision-making, secure funding, and align senior stakeholders across business and technology divisions.
- Integrated **AI-powered insights into client workflows**, enabling data-driven decision support and accelerating time-to-insight for enterprise clients.
- Led quarterly planning cycles, OKR definition, and outcome-based metrics tracking — ensured product investments mapped directly to measurable business outcomes.

Technical Product Owner - Data Insights | Feb 2020 – Dec 2021

- Owned **two flagship data products generating \$19.5M+ ARR** — defined product strategy, ran sprint planning, managed backlog, and delivered against quarterly roadmap commitments.
- Delivered **multilingual NLP sentiment analysis** across 60K+ reviews, reducing manual processing effort by **85%** and expanding analytical capacity for enterprise research teams.
- Partnered with **Compliance and Data Governance** teams to ensure full alignment with regulatory and data protection standards — established data quality standards and QA metrics that lifted **NPS from 40 to 60**.
- Applied **dual-track Agile (discovery + delivery)** to align continuous user research with sprint execution, reducing release cycle time by 28%.

Xebia | Product Owner (Consultant) | May 2019 – Feb 2020

- Delivered NBA recommender for retail banking, achieving **75% adoption** and reducing cycle time by **50%**.
- Ensured analytics solutions adhered to **data governance, security, and compliance** standards.

UnitedHealth Group | Scrum Master / Product Owner (Analyst) | Dec 2016 – Apr 2019

- Led Agile transformation from traditional delivery to modern product operating model.
- Managed sprint planning, reviews, retrospectives, and cross-team dependencies for OptumRx.

Tech Mahindra & Ericsson (Early Career) | Software Engineer | Jan 2014 – Dec 2016

- Built early foundations in SDLC, system design, agile practices & deployment management.

Education & Certifications

- **B.Tech, Electronics & Communication Engineering** – GGSIPU, Delhi (74%)
- **Digital Product Management, Business Strategy & Advanced Strategy** – Darden (UVA)
- **CSPO | SAFe | IBM Design Thinking Practitioner | User Story Mapping (Jeff Patton)**
